

MinnSNOWta[®] ROOF RAZOR[®]

EFFECTIVE

QUICK AND EFFICIENT!

Simplicity of design, strength, and ease of use make the MinnSNOWta Roof Razor[®] more efficient and profitable for commercial roof cleaning. Ideal for home, cabin, and winter resort owners.

EASY

EASY ON YOUR BODY!

The MinnSNOWta Roof Razor[®] does not rely on brute strength. A simple push is all that is needed to clean snow off your roof. The Roof Razor makes it simple to eliminate ice build up and prevent damaging ice dams.

UNIQUE

REMARKABLY INNOVATIVE!

The double cutting surfaces of the MinnSNOWta Roof Razor[®] head allow the Roof Razor to remove snow by undercutting deep or drifted snow. The snow eventually collapses by its own weight onto the poly chute and slides off the roof. Poly wheels keep the Roof Razor above the surface preventing damage to frozen shingles.

SIMPLY THE BEST!

- ◆ **Light** enough to manage easily.
- ◆ **Easy** to use. Gravity is doing all the work.
- ◆ **Heavy** enough to stay securely on the roof.
- ◆ **Solid** enough to cut through heavy, wet, or densely drifted snow.

Made In The USA

Designed, built, and tested in Minnesota by people who know cold and snow. This snow cleaning/snow removal system is designed for simple and efficient use and long lasting durability. It is easy on the human body. No *lifting, chopping, and pulling*. Just grab the pole and push. *Gravity does all the work!*

Dual Cutting Action

The MinnSNOWta Roof Razor® will cut a tunnel into even the deepest snow-covered rooftop. Dual cutting action created by the axle and the upper bar slices through all snow types like a sharp knife. Watch volumes of snow collapse onto the slide chute and quickly slide safely off any shingled or metal roof. The wide-cutting head saves time and gets even the biggest jobs done in no time. The Roof Razor's design protects cold roof surfaces from chop damage that is inflicted by conventional roof rakes. Poly wheels keep the lowest cutting edge one inch above the shingles.

Quality snap connectors assure solid connections and rigid operation.

Ergonomically Design

The first section rests on the edge of the roof until you have cleared as much snow as you can easily reach. A second, third, and fourth pole section extend your reach. Simply push the razor head upward into the snow on the roof and watch the snow slide down the chute. Gravity is doing all the work.

Strong & Durable

The most impressive feature about the MinnSNOWta Roof Razor® is its durability. It will be the last tool you will ever purchase to clear snow from your roof. Manufactured from tough aluminum and steel, the Roof Razor will endure severe winter climate abuse in temperatures as low as 40 degrees below zero. This is an industrial quality tool and a worthwhile investment. A necessity for private homeowners and commercial maintenance crews.

SPECIFICATIONS

- The razor head is constructed of 3/16" aluminum flat stock and is 36" wide (Titan model) or 24" wide (Dynamo model) and 6" high. Overall assembled length is 24 feet.
- Strong, lightweight aluminum handle system consists of four 6' snap-connected sections.
- 10-foot long slide chute attaches with bungee cord to the third handle section.
- Poly wheels keep the head frame above the surface. Optional 4-inch wheels are available for metal roofs, vinyl and membrane roofs and 6-inch wheels for Spanish half-round clay tile roofs as well as European clay tile roofs.
- Additional 6' pole sections are available.

SHIPPING INFO

Carton size Roof Razor® Titan Roof Rake:

- 3 1/2" high
- 73" long
- 11 1/2" wide

Carton size Roof Razor® Dynamo Roof Rake:

- 4" high
- 73" long
- 8" wide

Total shipping weight:

- Roof Razor® Titan Roof Rake - 16 lbs.
- Roof Razor® Dynamo Roof Rake - 13 lbs.
